Subject: Discovry Packet: Comm v. [REDACTED]

Hi Dave-

I received the request for information that you faxed over and started looking through it. I have a pretty big question regarding the lab numbers that you wrote down, specifically numbers [REDACTED]. Our database shows that Rebecca Pontes was the chemist that analyzed those submissions, not me. Also, besides the 3 numbers that you put a question mark next to ([REDACTED]), I noticed that [REDACTED] and [REDACTED] have different defendants listed ([REDACTED]) and not just the West Springfield Case Number ([REDACTED]). Are all of the numbers part of this case?

As for the actual discovery packet, some of the information that I will provide may be accurate for both Rebecca's and my analyses, but others information may not (even without pulling and looking at the hard data yet, I think that it is likely that we used different Gas Chromatography-Mass Spectrometry instruments). Should we each prepare a discovery packet? Or should I prepare it and then include a document from Rebecca that highlights any differences? Any other suggestions?

-Sonja
